

Automatic turning machine after-sales service engineer

Introduction

We are looking to employ an engineer to join our after-sales service team, who will manage repairs and installation work for our single-spindle machines, known as automatic turning machines in Switzerland (80%), as well as overseas (20%).

Your responsibilities

- Installing and commissioning our single-spindle machines
- Identifying faults, performing diagnostics and troubleshooting
- Upgrading our single-spindle machines in accordance with the instructions
- Reporting to your superior any comments made by customers that could be used to bring about positive developments in our products

Your profile

- Qualified mechanic, micro-mechanic, mechanic/electrician or equivalent
- Ability to speak French, German and/or English
- Experience of working with electricity
- Ability to work independently
- Familiarity with single-spindle machines would be a plus
- Experience in swarf evacuation would be an advantage
- Willingness to travel frequently to customers' premises, both within Switzerland and overseas
- Willingness to participate in training in areas in which there are knowledge gaps
- Good understanding of IT tools
